

# Masks

I like to wear masks!  
I wear masks on Halloween.

I wear masks when I dress  
up at home, and at school  
too.

But now, I see a different  
kind of mask.

**LOTS** of people are wearing  
masks.

When I go to the doctor's office,

The doctors  
and nurses  
wear  
masks.

The other  
moms,  
dads, and  
kids wear  
masks too.

When I go to the store people wear masks.

When I go for a walk people wear masks.

Sometimes even teachers wear masks.

Are they all dressing up like  
doctors?

Because, Masks can help  
**FIGHT** the germs!

But... HOW?

Your nose and mouth are  
like **DOORS**.

They can let germs **IN**.  
They can let germs **OUT**.

Coughing and **EVEN TALKING**  
can spray little bits of spit out.

And that spit carries a  
**LOT** of germs!

Masks say **“STOP!”** to the germs.

The masks **do not** let the germs out.

If someone else  
is coughing  
and talking  
and spraying  
their germs.

Masks can  
keep you  
safe.

The masks  
**keep** the  
germs out of  
your body.

It may be strange at first  
seeing so many people with  
masks on.

But now I know it is to keep  
us all safe.
